TOXICOLOGY

VOLUME CONTENTS

Volume 55 (1989)

Effects of diethyldithiocarbamate on the toxicokinetics of cadmium chloride in mice **(Complex formation with DDC leads to complex changes in cadmium distribution and has no antidote effects)**
by O. Andersen and J.B. Nielson (Odense, Denmark) 1–14

Toxicity of cadmium oxide instilled into the rat lung. I. Metabolism of cadmium oxide in the lung and its effects on essential elements **(The pulmonary clearance profile for Cd depends upon initial lung burden and not on the chemical form)**
by S. Hirano, N. Tsukamoto, E. Kobayashi and K.T. Suzuki (Ibaraki, Japan) 15–24

Toxicity of cadmium oxide instilled into the rat lung. II. Inflammatory responses in broncho-alveolar lavage fluid **(No-effect levels of intratrachealy instilled cadmium appear to be 2 μg per rat)**
by S. Hirano, N. Tsukamoto, S. Higo and K.T. Suzuki (Ibaraki, Japan) 25–35

Interspecies comparison of pharmacokinetic profile and bioavailability of (±)-gossypol in male Fischer-344 rats and male B6C3F mice **(Differin pharmacokinetic profiles may explain the differential sensitivity of mice and rats to the contraceptive and toxic effects of gossypol)**
by M.B. Abou-Donia, M.A. Othman and P. Obih (Durham, NC) 37–51

Factors associated with reduced fertility and implantation rates in female mated to acrylamide-treated rats **(Acrylamide treatment reduced fertility and increased pre- and post-implantation losses)**
by V.H. Sublet, H. Zenick and M.K. Smith (Cincinnati, OH and Washington DC, ... 53–67

Cytotoxicity of an organic hydroperoxide and cellular antioxidant defense system against hydroperoxides in cultured mammalian cells **(Cytotoxicity of t-BHP is induced by an iron-dependent and radical mediated mechanism)**
by T. Ochi and S. Miyaura (Kanagawa, Japan) 69–82

Comparisons of the toxicity of $CdCl_2$ and Cd–metallothionein in isolated rat hepatocytes **(Primary cultures of rat hepatocytes mimic in vivo $CdCl_2$ and CdMT toxicity)**
by L.E. Sendelbach, W.M. Bracken and C.D. Klaassen (Kansas City, KS) 83–91

Inhibition of benzo[*a*]pyrene-7,8-diol formation in vitro by complex organic mixtures **(The in vivo observed inhibition of benzo[*a*]pyrene-induced tumor initiation by coal-derived complex organic mixtures may be due to a reduced rate of carcinogen metabolism)**
by D.A. Dankovic, B.L. Thomas, R.C. Zangar, D.W. Later and D.L. Springer (Richland, WA and Salt Lake City, UT) 93–102

A new monoclonal antibody to study mouse macrophage antigen during BHT-induced lung injury and repair **(A particular antibody reognizes a 100 kDa protein associated with lung damage by BHT and oxygen)**
by S.J. Kennel, T. Lankford, P. Galloway and H.P. Witschi (Oak Ridge, TN) 103–116

Renal kallikrein excretion as a distal nephrotoxicity marker during cadmium exposure in rats **(Chronic cadmium administration leads to complex changes in some distal tubular functions)**
by J.P. Girolami, J.L. Bascands, C. Pécher, G. Cabos, J.P. Moatti, J.F.Mercier, J.M. Haguenoer and Y. Manuel (Toulouse and Lille, France) 117–129

Lipid peroxidation: A possible mechanism of trichloroethylene-induced nephrotoxicity **(Under hypoxic conditions lipid peroxidation is involved in the mediation of toxic action)**
by C. Cojocel, W. Beuter, W. Müller and D. Mayer (Frankfurt, FRG) 131–141

The developmental toxicity of uranium in mice **(Eleven oral doses of uranium during the gestation lead to fetal damage which may be dose dependent)**
by J.L. Domingo, J.L. Paternain, J.M. Llobet and J. Corbella (Barcelona, Spain) 143–152

Effects of prenatal methylmercury exposure on urinary proximal tubular enzyme excretion in neonatal rats **(Prenatal methylmercury has little effect on postnatal renal function)**
by A.M. Saillenfait, M.T. Brondeau, D. Zissu and J. De Ceaurriz (Vandoeuvre, France) 153–160

The toxicity, distribution and excretion of ricin holotoxin in rats **(The toxicokinetics of the plant protein are described)**
by C.S. Ramsden, M.T. Drayson and E.B. Bell (Manchester, UK) 161–171

Selective retention of toxic polychlorinated dibenzo-*p*-dioxins and dibenzofurans in the liver of the rat after intravenous administration of a mixture **(The complex toxicokinetics of about a dozen members of this group of chemicals in the liver is described)**
by M. van den Berg, J. van Wijnen, H. Wever and W. Seinen (Utrecht, The Netherlands) 173–182

Mutagenicity of cisplatin and carboplatin used alone and in combination with four other anticancer drugs **(Susceptibility of different bacterial strains in the Ames test to platinum compounds are not affected by combination with other carcinostatic drugs)**
by M.A. Hannan, A.A. Al-Dakan, S.S. Hussain and M.H. Amer (Riyadh, Saudi Arabia) 183–191

The choroid plexus as a target site for cadmium toxicity following chronic exposure in the adult mouse: an ultrastructural study **(100 ppm cadmium in drinking water cause degenerative changes in the chloroid plexus)**
by A.A. Valois and W.S. Webster (Sydney, Australia) 193–205

Studies on the induction of cholangiofibrosis by coumarin in the rat **(An extensive account of the effects of coumarin on the liver)**
by J.G. Evans, E.C. Appleby, B.G. Lake and D.M. Conning (Surrey and London, UK) 207–224

Exacerbation of tallysomycin toxicity in rats by concurrent exposure to sublethal hyperoxia **(Diffuse interstitial lung lesions and vascular damage produced by tallysomycin is enhanced by hyperoxia)**
by D.B. Coursin, H.P. Cihla and T.D. Oberley (Madison, WI) 225–237

A unique case of intravenous injection of fungal "pancreatic" enzymes causing shock and proteolysis of haemostatic proteins **(Intravenous injection of hydrolytic pancreatic enzymes causes severe disturbance of blood coagulation and elastase release)**
by R. Seitz, G. Adler, I. Koop, H. Koop and R. Egbring (Marburg, FRG) 239–246

Book reviews 247–250

Review Paper

Toxicity of dibutyltin, tributyltin and other organotin compounds to humans and to experimental animals
by I.J. Boyer (Washington, DC) 253–298

Research Papers

Plasma concentration and placental transfer of bromofenofos in rats **(Bromofenofos is rapidly hydrolyzed and circulates as dephosphate bromofenofos in the plasma with a half-life of approximately 24 h)**
by H. Yoshimura and Y.S. Endoh (Tokyo, Japan) 299–306

Metallothionein immunoreactivity in the liver and kidney of copper injected rats **(Copper induces metallothionein in liver, kidneys and plasma but not in erythrocytes)**
by L.M. Williams, H. Cunningham, A. Ghaffar, G.I. Riddoch and I. Bremner (Aberdeen, UK) 307–316

Polyamine synthesis in rat lungs injured with alpha-naphthylthiourea **(ANTU-induced lung edema in rats is not mediated by an increase in lung polyamines)**
by J.W. Olson, S.A. Gebb, U. Orlinska and M.N. Gillespie (Lexington, KY) 317–326

Hepatotoxicity of pulegone in rats: Its effects on microsomal enzymes, in vivo **(An oxidative metabolite seems to decrease cytochrome *P*-450 and to cause liver damage)**
by B. Moorthy, P. Madyastha and K.M. Madyastha (Bangalore, India) 327–337

Renal binding of cadmium in the rat following intragastric exposure **(Enteral cadmium interferes with copper absorption and reduces renal copper)**
by J.A. Szymańska, E.M. Bem, J.K. Piotrowski, S. Brzeźnicki and T. Baran (Łodz, Poland) 339–348

Erratum 349–351

Contents of Journals relating to Toxicology 353–356

Subject Index Volume 55 357–360

Author Index Volume 55 361–362
